

## UNIQUE JOB OPENING FOR A PRIMARY CARE PHYSICIAN

DDC Clinic is seeking a primary care physicians to join its highly respected center for the care of individuals with rare genetic disorders. We are a medical home providing culturally competent medical services, patient-centered research, an in-house molecular diagnostics laboratory, and education and support for families. Our 11,000 square foot LEED Gold facility was designed to provide world-class personalized medicine in an environment that's comfortable for patient families and conducive to research and collaborations with major medical centers. Our previous collaborations have resulted in over 80 peer-reviewed publications.

The successful candidate will have the opportunity to practice medicine in a center with more than a two-decade track record of identifying, diagnosing and treating patients affected by more than 250 rare conditions. The new physician will work closely with geneticists, cardiologists and other team members for patient care and research. They are also expected to be involved with the newly launched Family Heart Center and Pennsylvania branch.

DDC Clinic is located in Middlefield, Ohio, the center of the world's fourth largest Amish settlement, just 40 minutes east of metropolitan Cleveland. Cleveland features world class arts and culture, outdoor recreation, major universities and medical facilities, and an international airport. Our location offers a high quality of life; allowing for short commutes to affordable housing and respected schools in suburban, small town and rural communities.

### QUALIFICATIONS

- BC/BE in Med-Peds, Family Medicine, Internal Medicine or Pediatrics.
- Experience in, or eagerness to learn diagnostics, evaluation, treatment and support of individuals with complex conditions.
- Demonstrated commitment to providing compassionate, culturally sensitive, cost effective care.
- Background or interest in genetic and metabolic disorders, neurodevelopmental disorders and cardiogenetic disorders is a plus.

### BENEFITS

- The opportunity to practice real medicine in a world-class medical home.
- The ability to advance translational medicine in a facility with a pioneering research and diagnostics laboratory.
- Full-time outpatient care with occasional home visits.
- Competitive salary, insurance benefits, 403b package, PTO and paid holidays.
- High quality work/life balance.
